EDUCATION

University of Illinois Urbana-Champaign

Champaign, IL

Bachelor of Science in Computer Science and Mathematics

Expected Graduation: May 2027

Relevant Coursework: Data Structures, Algorithms, Linear Algebra, Computer Systems, Discrete Mathematics, Object Oriented Programming, Machine Learning

EXPERIENCE

Amazon

Dec. 2025 – Jan. 2026

Operational Strategy & People Analytics Extern

Remote

- **Automated ingestion** and preprocessing of **5,000+** qualitative **data points** from Glassdoor and YouTube using **Python**, ensuring data integrity for large-scale sentiment analysis.
- Conducted **sentiment-based data analysis** and keyword extraction to identify cultural trends, directly informing a **pilot intervention** designed to **reduce business risk** and improve **worker retention**.

University of Illinois Chicago (MaSE Lab)

June 2025 – Aug. 2025

Automation Software Intern

Chicago, IL

- **Automated microscope stage movement** using **Python and OpenCV**, reducing manual alignment time by **70%** for chemical fluid-distribution systems via precise robotic control.
- Engineered a **computer vision pipeline** achieving **95%+ well-detection accuracy**, identifying and centering manifold wells across **100+** experimental samples to **boost reliability**.
- Integrated **real-time microscope imaging** with hardware control to **streamline high-throughput experimentation** workflows.

AiC Company

Mar. 2024 – Aug. 2024

Full-Stack Web Development Intern

San Francisco, CA

- Built **e-commerce components** using **JavaScript, Node.js, and PostgreSQL** for a startup delivering **HLS and WebRTC** services for **soccer streams**.
- Implemented a **pay-per-view/per-language** feature for the HLS player using the **Stripe API**.
- Developed a **multi-page store** with user registration and customer support, **reducing user drop-off by 20%**.

PROJECTS

SnapLink (SparkHacks 2025) | *Spring Boot, Java, React.js, MongoDB, APIs*

Feb. 2025 – Feb. 2025

- Built a **job-matching platform** connecting **local business owners** with job seekers for part & full-time roles.
- Implemented a **mapping feature** utilizing longitude/latitude data to filter opportunities based on **real-time commuting times** and keywords.

SoccerRanker | *JavaScript, Node.js, Render*

July 2024 – Aug. 2024

- Developed a interactive soccer website featuring player rankings, rank explanations, and **80+** unique "Would You Rather" questions with percentage data gathered from **750+ reddit survey responses** for multiple clubs
- Developed a soccer **REST API** in addition to the website, showing player profiles with multiple filter options, real-time global soccer news retrieval, and supporting all **CRUD operations**

ACTIVITIES AND LEADERSHIP

SIG AI Project Lead

Oct. 2024 – Dec. 2024

UIC Association For Computing Machinery

Chicago, IL

- **Led a team of four** to build a sentiment analyzer using a **RoBERTa Python model**, accessible through the **Hugging Face Transformers** library.
- Processed **1,000+ Amazon reviews**, analyzed data, applied **machine learning**, and integrated the **Google Translate API** to expand model accessibility to **100+ languages**, improving **cross-regional data utility**.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, SQL, TypeScript, C, C++, HTML/CSS

Frameworks/Libraries: Spring Boot, React.js, Next.js, Node.js, React Native, Express.js, PyTorch, Scikit-Learn

Tools and Databases: MongoDB, AWS, Linux, PostgreSQL, Git, Docker, Render, Postman, CI/CD, AI Tools
