## EDUCATION

### University of Illinois Urbana-Champaign

Champaign, IL

*Bachelor of Science in Computer Science and Mathematics*

*Expected Graduation: May 2028*

**Relevant Coursework:** Data Structures, Algorithms, Linear Algebra, Computer Systems, Discrete Mathematics, Object Oriented Programming, Machine Learning, Statistical Analysis

## EXPERIENCE

### Amazon

Dec. 2025 – Jan. 2026

*Operational Strategy & People Analytics Extern*

*Remote*

- **Automated ingestion** and preprocessing of **5,000+** qualitative data points from Glassdoor and YouTube using **Python**, implementing **ETL** workflows for large-scale **sentiment analysis**.
- Conducted **sentiment-based data analysis** and keyword extraction to identify cultural trends, directly informing a **pilot intervention** designed to **reduce business risk** and improve **worker retention**.

### University of Illinois Chicago (MaSE Lab)

June 2025 – Aug. 2025

*Automation Software Intern*

*Chicago, IL*

- **Automated microscope stage movement** using **Python** and **OpenCV**, reducing manual alignment time by **70%** for chemical fluid-distribution systems via precise robotic control.
- Engineered a **computer vision pipeline** achieving **95%+ well-detection accuracy**, identifying and centering manifold wells across **100+** experimental samples to **boost reliability**.
- Integrated **real-time microscope imaging** with hardware control to **streamline high-throughput experimentation** workflows.

### AiC Company

Mar. 2024 – Aug. 2024

*Full-Stack Web Development Intern*

*San Francisco, CA*

- Built **e-commerce components** using **JavaScript**, **Node.js**, and **PostgreSQL** for a startup delivering **HLS** and **WebRTC** services for **soccer streams**.
- Implemented a **pay-per-view/per-language** feature for the HLS player using the **Stripe API**.
- Developed a **multi-page store** with user registration and customer support, **reducing user drop-off by 20%**.

## PROJECTS

### Verbexa AI | *React.js, Next.js, Typescript, SQL, Supabase, Vapi, Clerk*

June 2025 – July 2025

- Developed an **AI tutoring platform** to deliver interactive **AI voice-agent** learning sessions in real-time.
- **Managed backend infrastructure** using **Supabase** and **SQL** for secure user storage and **Clerk** for authentication.

### StockBits | *Python, Scikit-Learn, NumPy, NLP, APIs*

Feb. 2025 – Mar. 2025

- Developed a **predictive analytics** engine using **Scikit-Learn Decision Trees** to forecast stock closing prices based on real-time market data fetched via the **yfinance API**.
- Engineered an automated messaging pipeline using **Twilio** and **REST APIs** to deliver financial news summaries and sentiment scores generated by **RoBERTa NLP models**.

## ACTIVITIES AND LEADERSHIP

### SIG AI Project Lead

Oct. 2024 – Dec. 2024

*UIC Association For Computing Machinery*

*Chicago, IL*

- **Led a team of four** to build a sentiment analyzer using a **RoBERTa Python model**, accessible through the **Hugging Face Transformers** library.
- Processed **1,000+ Amazon reviews**, analyzed data, applied **machine learning**, and integrated the **Google Translate API** to expand model accessibility to **100+ languages**, improving **cross-regional data utility**.

## TECHNICAL SKILLS

**Languages:** Python, Java, SQL, Typescript, JavaScript, C, C++, HTML/CSS

**Frameworks/Libraries:** Scikit-Learn, NumPy, React.js, Next.js, Node.js, Spring Boot, React Native

**Tools and Databases:** AWS, MongoDB, Linux, PostgreSQL, Git, Docker, Render, Postman, CI/CD, Claude, Gemini
