EDUCATION

University of Illinois Urbana-Champaign

Champaign, IL

Bachelor of Science in Computer Science and Mathematics

Expected Graduation: May 2028

Relevant Coursework: Database Systems, Data Structures & Algorithms, Linear Algebra, Computer Architecture

EXPERIENCE

Amazon

Mar. 2026 – Present

Operational Strategy & People Analytics Extern

Remote

- Automated ingestion of **5,000+** unstructured **data points** from Glassdoor using **Python ETL** and **Pandas**.
- Conducted **sentiment-based data analysis** and applied **NLP** keyword extraction to identify cultural trends, reduce business risk, and improve worker retention in **Amazon Fulfillment Centers**.

University of Illinois Chicago (MaSE Lab)

June 2025 – Aug. 2025

Software Engineering Intern

Chicago, IL

- Cut manual alignment time by **70%** by automating microscope stage movement using **Python** and **OpenCV**.
- Achieved **95%+ well-detection accuracy** via a computer vision pipeline across **100+** experimental samples.
- Integrated real-time microscope imaging with hardware control **APIs** to enable high-throughput experimentation.

AiC Company

Mar. 2024 – Aug. 2024

Full-Stack Web Development Intern

San Francisco, CA

- Built e-commerce features in **Node.js**, **JS**, and **SQL** for a startup delivering soccer streaming services.
- Reduced user drop-off by **20%** by developing a **multi-page store** with user registration and customer support.

PROJECTS

Prism (HackIllinois 2026) | Python, RAG, Claude, Pinecone, Modal, FastAPI

Feb. - Mar. 2026

- Built an **AI agentic pipeline** autonomously converting app reviews into tested **GitHub PRs** to fix issues.
- Engineered a **RAG-based** retrieval system using Voyage AI + **Pinecone**, orchestrating **GPU-accelerated ML inference** within isolated **Modal Sandboxes** (gVisor) to ensure secure, high-performance execution.
- Designed a self-correction loop feeding **Pytest** failures back into Claude, resolving errors until all tests pass.

Verbexa AI | TypeScript, React, SQL, Next.js, Supabase, Vapi, Clerk

June 2025 – July 2025

- Developed an interactive **AI tutoring platform** delivering real-time voice-agent learning sessions via Vapi.
- Architected backend with **SQL/Supabase** for user storage and Clerk for secure, scalable multi-user access.

SoccerRanker | Node.js, JavaScript, Express, Render, Google Analytics

July 2024 – Aug. 2024

- Developed an interactive website featuring player rankings and explanations, and **80+** unique "Would You Rather" questions with percentage data gathered from **750+** points of survey data from Reddit.
- Developed a **2-in-1 soccer REST API** supporting player profiles, real-time news, and full **CRUD** operations.
- Scaled to **10,000+** impressions and **15+ users**, generating consistent subscription revenue through **RapidAPI**.

ACTIVITIES AND LEADERSHIP

SIG AI Project Lead

Oct. 2024 – Dec. 2024

ACM, University of Illinois Chicago

Chicago, IL

- Led a team of four** to build a multilingual sentiment analyzer using a **RoBERTa Python model**.
- Processed **1,000+** Amazon reviews, applied **machine learning**, and translated with the **GTranslate API**.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript, C, HTML/CSS

Frameworks & Libraries: Node.js, React, FastAPI, Next.js, React Native, Scikit-Learn

Tools & Databases: Git, AWS, Google Analytics, Docker, Databricks, Pinecone, CI/CD, PostgreSQL, LLMs
